

Description and price of your products and services

You're selling products

Please send us by email a description in 8-12 lines and in English for each product or service to be put on sale/networking that we can publish on the platform. If your product or service is already described in a catalog, please attach it to your email. For each product, please indicate the price in Euro (if you're selling worldwide and in Switzerland) or in CHF (in you're only selling in Switzerland).

Sales rate for your products

The registration and display of your products on the Climate Show Market platform are free for a year. However, in case you want to use the credit card e-commerce system, 8.5% will be charged on each item sold (credit card fees).

- Please tick the box if you want to use the ecommerce credit card sales system (8.5% charged per item sold)

You're selling services

Please send us by email a description in 8-12 lines and in English for each product or service to be put on sale/networking that we can publish on the platform. If your product or service is already described in a catalog, please attach it to your email.

Sales rate for your services

The registration and display of your products on the Climate Show Market platform are free for a year.

Pictures of your products, services or prototypes

Send the corresponding picture of each product or service. The resolution of the pictures must be of at least 500 pixels. All pictures/images must be owned by you or you must have the full required copyright to use it.

- For a service: attach a photo that illustrates the service
- For a product: attach a photo of the product
- For prototypes: attach the image of the model, the plan or any other image that could illustrate your prototype

We would like to put up for sale our products or services in one of the following categories:

Renewable Energies & Increasing Energy Efficiency:

Demonstration of tools and equipment for energy efficiency and production of renewable energies; Biomass, wind turbines, solar cells (solar kits), solar thermal energy, solar fuels and fuel cells, alternative solutions such as wave energies, etc.

Building:

Improving the thermal insulation of family homes, apartment buildings and administrative buildings, heat recovery techniques, replacement of heating systems with renewable energies, solar windows, etc.

Mobility:

Efficient vehicles that meet sustainability criteria such as electric bicycles, electrical terminals, electric cars, public transport such as electric buses, biodiesel engines, etc.

Financing Sustainable Projects:

Ecological, sustainable mortgages, subsidies (certifications, clean carbon market in Switzerland and in the EU, the UN Green Fund, allocation, criteria, operation, etc.); Climate ventures and climate bonds, the Swiss carbon market and EU-ETS (the carbon emission trading market), etc.

Adaptation to climate change:

Solutions for climate change resilience; Smart irrigation to counter erosion and drought, construction of wetland systems, early warning systems; New Information Technology systems for monitoring drought and natural hazards in the Alps, protection of glaciers, etc.

Circular economy and recycling:

Eco-principle solutions including recycling principles and valorization processes such as in agro-food biomass, waste reduction, replacement of synthetic materials such as plastics, etc.

Others:

All other services related to the promotion of climate protection and sustainable development.

Intellectual Property and Copyrights

By signing this form, the participant confirms to possess all the intellectual property rights including the copyright of the photos, images, plans, models, etc. of products, prototypes or services provided to the Climate Show Market for sale on the sales and networking platform of the Climate Show Market.
